Fully Autonomous Mobile Platform

The fully autonomous mobile platform emits concentrated UV-C light onto high, medium and low touch surfaces in support of normal cleaning routines. It is the only UVC disinfection system capable of repositioning itself in any environment — thereby getting close enough to all critical high touch surfaces during the disinfection process.

Benefits

- ◆ Prevents and reduces the spread of infectious microorganisms
- ◆ Safe, reliable, and user friendly operation
- ◆ Reduces acquired infection rates and associated costs
- ◆ Uses 254 nm UV-C wavelength

Applications
